### **Purpose:**

The Dynamics of our homeless changed overnight. Our community now has many “new” homeless. We, in the CoC Community, know the homeless and the precariously housed population we had prior to the #campfire still have the same needs as they did on Nov 7th. Our CoC has worked very hard these past years, and especially this year to come together and talk openly about our challenges with the infrastructure of our systems, the financial limitations, the personnel limitations and we have also learned that we need to and have celebrated our successes. We, the partner agencies, advocates, cities and counties are at a fork in the road for our homeless.

It seems to keep coming back to the idea that unprecedented circumstances should create an openness to unprecedented solutions. We have a couple of choices to make, and because choices need to be made, NOW while there is good will and a sense and desire to help and to house, we are asking that we come together on a Saturday for this special meeting that will focus on the role of the CoC in the coming months and years.

We will be joined by our HUD TA (Technical Assistance) Disaster Rep for the homeless programs as well as hopefully, members from the Sacramento CoC who want to assist us in our time of need. Please let us know if you will join us. Thank you.
